

# The Sierra 7™

## Multi-position Modular Small Arms Bipod

100% designed, machined, and assembled in Atlanta, GA, USA

### **Product: The Sierra 7™ Bipod**

When our personnel are in the field, they need a dependable, easy to carry shooting rest.

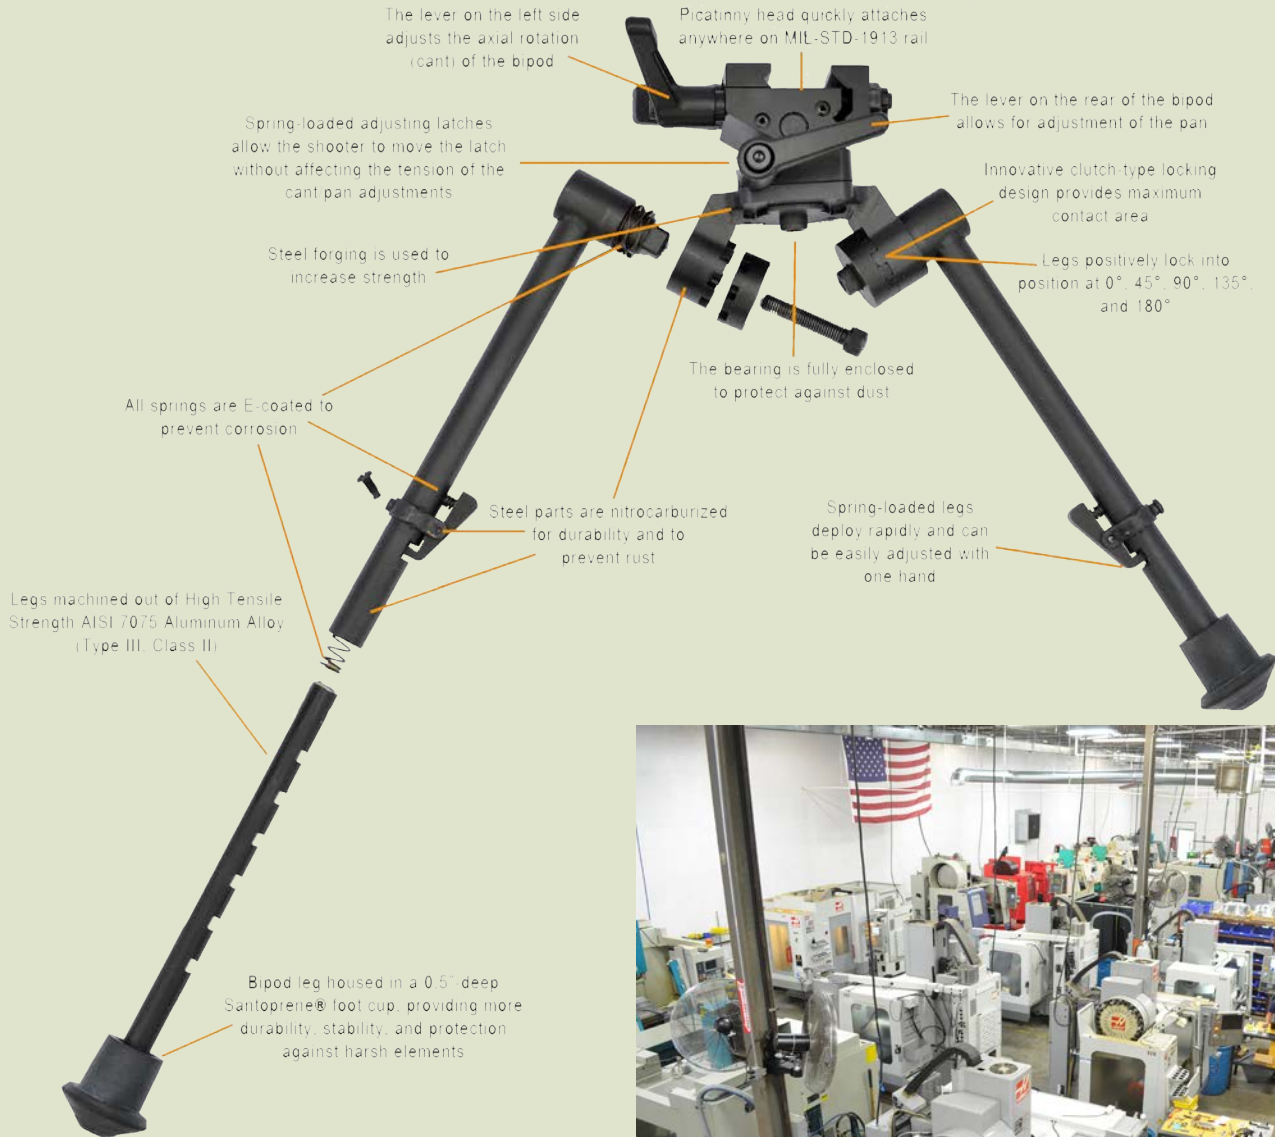

The Sierra 7™ is the most up-to-date, fully featured, and reliable small arms bipod on the market. Designed in conjunction with top-level competitive shooters and active-duty personnel, the Sierra 7™ has revolutionary, patent-pending features not found on any competing bipod. It gives the shooter the control and stability needed to make the perfect shot, even under the most difficult circumstances.

#### **Specs: (full product details on back of page)**

- Bipod Height: 7.00 in
- Bipod Height w/legs fully deployed: 9.00 in
- Bipod Weight: 3.00 lbs
- Bipod Strength: 1470 pounds of force (lbf) before critical failure
- Bipod Strength w/legs fully deployed: 1010 lbf before critical failure

## Relevance: Gives Operational Advantage to the Warfighter

The Sierra 7 is designed to add precision and give critical stability to precision shoulder-fired weapons systems. Easy to install and use, the Sierra 7 quickly installs on any standard mil-spec "Picatinny" rail. Expertly designed and manufactured, it is the only bipod that offers perfectly smooth tracking and canting features, allowing the shooter to engage moving targets and transition from target to target without any vibration or variation in precision. The Sierra 7 has a clear advantage in long-range precision shooting, when used by an individual marksman or as part of a sniper team.
